

Ocean Wall

creating environments

Create spaces with Ocean Wall...

Developed to provide a versatile, high performing, mobile portable platform made for workspace environments that demand excellent functionality and acoustics. Ocean Wall will fit perfectly into your existing aesthetic yet adapt to your changing needs.

Who we are

Panel UK is a proud British manufacturer in the North of England. Established in 1999, we have unrivalled experience within the global office furniture industry exporting to many countries. Where other companies import product we design, fabricate & assemble, by hand, each & every product to the highest of quality standards. Our in-house skills allow us the flexibility to offer a truly unique service, including bespoke products if needs be, suited to your project's precise needs.

What we do

Our guiding principles are to use recycled raw material, the least components & have a highly skilled workforce to create reusable & reconfigurable products of the highest quality, least impactful on the environment at an affordable cost. Our products are insightfully designed, & responsibly manufactured using lean methodologies to reduce waste. We are innovative where possible, with a specific emphasis on recycled content as well as the processes we operate, we are fully committed to a low carbon society.

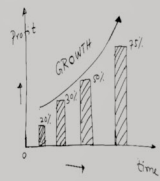

Sustainability

The focus & drive of everything we do is to protect the environment through sustainable design & manufacturing, to create a better & more prosperous world to live in. We do this by designing products that last, using recyclable materials, with a local UK labour force. Our carbon footprint is small, we source components locally, where possible, & endeavour to minimise our impact on the environment.

Features and Functions

Ocean Wall is crafted from durable high-grade aluminium, it ensures both structural stability and a sleek, modern robust appearance.

The subtly contoured mobile feet not only enhance its sturdiness but also provide a nice contrast to the aluminium framework.

Using a two-pass powder coating paint process our best-in-class paint finish lasts. The framework is available in Black (RAL 9005) or White (RAL 9010), but we can also offer any RAL paint for an extra cost.

The Ocean Wall divider offers an array of versatile configurations designed to meet your unique requirements, available in many options.

Ocean Wall can come in a planter configuration so you can introduce biophilia design into your scheme (plants not included).

We can integrate spotlights or strip lights into Ocean Wall to make your workspace a little brighter and enhance employee freshness.

Ocean Wall can come with lightweight, pinnable fabric, laminated and even dry-wipe panels for that interactive presentation.

We can also integrate a clothes hanging rail & shelves into Ocean Wall to provide a place for additional storage.

Versatile mobile screen system

Ocean Wall's modular design enables seamless side-by-side configurations, allowing you to create larger partitions or design elements to suit your specific space and aesthetic preferences - **create zones by defining a space - making neighbourhoods.**

This 360-degree rotatability ensures that you can quickly adapt your space to suit different requirements, whether you want to create separate areas, create privacy, optimize your screen viewing angle, or easily access shelves, whiteboard, or planters from either side.

FABRIC

RE-SPUN by Inloom is created by recycling old garments which are collected from recycling bins and taken to the factories to be sorted into clothes which can be resold as pre-loved or cut into rags to start the production of creating recycled wool. The sustainability of the process is added to by the almost complete elimination of dyes because of the way the wool is recycled, helping to safeguard the planets natural resources.

Dimensions - Typical

Height 1900mm
Width 1200mm or 1600mm
Depth 450mm

NOTE: Panel is a UK based manufacturer, offering the flexibility to produce alternative sizes if required.
